If you want your contact details withheld, please let us know by ticking this box. <input checked="" type="checkbox"/>			

The Central Hawkes Bay Aeroclub has been a part of the local community since 1935 and has a proud history of being a core part of what this district is about.

We pride ourselves on supporting local organisations and charities. We currently host the Hawkes Bay child cancer foundation bi-annually of which we donate flights from club and private aircraft to children and their families that are going through what is a tough time and the feedback we get is something rather humbling.

Part of our wider service is providing a place for local emergency services to practice on and just the start of this year was used as a filling point for aircraft to fight the grass fire at Takapau. The Rescue helicopter frequently uses the aerodrome as a pick up point for local citizens requiring fast transfer to Hawkes bay hospital. We have been approached to host an emergency services open day at the club next year which will bring fire ,ambulance and the local rescue helicopter in for public viewing and education.

A big draw card for us is our quality flight training we provide which draws students from far and wide. This is not a large training organisation like many others but its one that has a strong history of providing a top level of training.

We are a volunteer run organisation and there are many people that put a lot of time into the clubs successful running . We don't make large profits and mostly we just cover costs.

We don't see ourselves growing in size or increasing aircraft movements as we don't have a sealed runway like other airfields.

Currently running around 3500 movements per annum we fall well below the threshold for noise contouring but we note its recommended that this be peer reviewed. This would put us in the same boat as the likes of Gisborne and Paraparaumu which have a high degree of commercial activity.

We would like to see acknowledgement by the council for what we do for the community. We feel more education needs to put in place for people moving into the vicinity of the aerodrome to accept that moving to a rural service town near an aerodrome is going to involve some degree of noise.

We see ourselves as an integral part of the community.
