NATURAL ENVIRONMENT VALUES	NFL – Natural Features and Landscapes	Amend	We have SNA 307 located on Mangapurakau Station. We fenced off this area over a decade ago for the intention that it would not be disturbed by grazing stock eg sheep and cattle so that it would revert back to its natural state. There are no redeeming features of this SNA other than it being a small native bush block. We have a poisoning programme in place to manage possums and other predators. Recently unwanted weeds eg blackberry have started to grow in this SNA that we are planning to manage ourselves. We have been doing all this work for our own benefit as there would be health and safety issues arising if anyone else was given access to this area. We are happy to maintain this area but feel it does not require an SNA allocated to it as the only way for members of the community to view this area safely is by plane.	Amend the rules around the SNA's and deletion of some, to give landowners back the rights over control on their own land and how it will be managed in the future as we are the only people to benefit from it due to health and safety concerns with access
